

Series 640-MP/06

Matt paste, silicone-free

Series 640-MP/06 is a specialized matting paste exclusively designed to harmonize with the silicone-free MS Basic Colors from the Series 640. Distinguishing itself from conventional matting powders, this matting paste stands out for its effortless incorporation.

For optimal results, adding between 5 % and 10 % by weight of the total mixture is advised. In cases where an adjustment beyond 10% by weight is needed to achieve the desired level of gloss, we recommend utilizing the matting powder, Series 10-0913. The typically recommended addition for this powder ranges from 3 % to 10 % by weight, ensuring proper incorporation with the use of high-shear forces.
