

# Series 10-MP

## Universal Mat Paste

Series 10-MP is a mat paste with a broad compatibility and excellent stir-in properties to printing inks. It is used to set the degree of gloss / opacity with Printcolor's product groups 200, 300, 600, 700 and 800. The usual addition ratio is 5-8 % by weight, depending on desired degree of gloss and product. Will more than 8% by weight be used to set the degree of gloss, one should change to the mat powder series 10-0913. Here, the usual addition ratio lies between 3-10 % by weight whereas an incorporation with high shear forces is to be considered.

### Specifications

|                                 |                   |
|---------------------------------|-------------------|
| <b>Thinner</b>                  | -                 |
| <b>Addition ratio</b>           | -                 |
| <b>Retarder</b>                 | -                 |
| <b>Addition ratio</b>           | -                 |
| <b>Hardener</b>                 | -                 |
| <b>Addition ratio</b>           | -                 |
| <b>Cleaner</b>                  | -                 |
| <b>Mesh</b>                     | -                 |
| <b>Drying</b>                   | -                 |
| <b>Substrates</b>               | -                 |
| <b>Indoor use / outdoor use</b> | -                 |
| <b>Further processing</b>       | -                 |
| <b>Over printing</b>            | -                 |
| <b>Available colors</b>         | -                 |
| <b>Available quantities</b>     | 1 kg, 5 kg, 25 kg |
| <b>Shelf life</b>               | 24 months         |
| <b>Others</b>                   | -                 |
